

Disclaimer

While every effort has been made to ensure that this documentation is accurate and reliable, NOAA cannot assume liability for any damages caused by inaccuracies in the NOAA polar orbiter data or documentation, or as a result of the failure of the data or software to function in a particular manner.

The maintenance of this document has historically focused primarily on assuring file format descriptions, platforms, and instrument descriptions are current. Information regarding ground system configurations, data production systems and other information not related to understanding and using of the datasets themselves may not be current.

Phone numbers, fax numbers, physical addresses, e-mail addresses and Internet Uniform Resource Locators (URLs) are subject to change. NOAA makes no warranty, expressed or implied, nor does the fact of distribution constitute a warranty.
